

HEALTHY LIFESTYLE

We will have relaxed conversation about a healthy lifestyle and a short education about edible, medicinal and poisonous mushrooms.

WHY KOSMAJ ?

Kosmaj is a beautiful mountain in Šumadija, only 60 km from Belgrade. The mountain is largely covered by dense vegetation, where one can encounter some of its 550 types of plants and 300 types of mushrooms—some edible, some medicinal, and some poisonous. Among them, you may find lilies of the valley, foxgloves, porcini mushrooms, sunflowers, and milkweed. Kosmaj and its surroundings boast a rich cultural heritage with numerous protected properties.

KOSMAJ- MUSHROOM WEEKEND

Mushroom hunting in the wild is like hunting for hidden treasure. Mushrooms have a special ability to awaken the hidden child in us!
